Canadian Council of Cardiovascular Nurses (CCCN)
2nd Annual National Spring Nursing Conference

Update Your Cardiovascular Nursing Toolkit

Friday, May 13th, 2011
Dalhousie University - Halifax, Nova Scotia

Visit www.cccn.ca for Updates

Plan to celebrate “National Nursing Week” and experience the warm and wonderful hospitality Nova Scotia has to offer by attending CCCN’s 2nd Annual National Spring Nursing Conference. This premiere event will address clinical relevant topics targeted at nurses in urban, rural and remote settings, practicing in acute care, community, or public health, in roles that span front-line to advanced practice, and any other health care professionals interested in updating their knowledge of cardiovascular (CV) disease prevention and management.

Here is what participants had to say about the 2010 Conference in Winnipeg:

“Useful information to take back to my co-workers”

“Speakers were engaging, well-prepared and very informative”.

“Topics are great. One day format is awesome! I like the strong clinical base content - very relevant to nursing practice”

This conference will also provide education needed for nurses in either obtaining or retaining CV Certification with the Canadian Nurses Association (CNA)*. For more information on obtaining CNA certification in CV nursing visit www.cna-aic.ca

Come knowing you will hear CV nursing experts speak on an array of clinically focused and practically based topics in Keynote/Plenary and Breakout sessions. Leave knowing you are better equipped to address the needs of CV patients and their families.
